

My Why?

I am a strong member for the AVID program because I show much dedication towards reaching my goals. Throughout highschool I have continued to set goals for myself. Every night I am making a plan of what I will conquer first, so that my work is completed ahead of time and I am ready for each day. In addition to being prepared and organized, I have accountability in my academics. I strive to complete projects and tests having gained and studied the necessary information. I am uncomfortable receiving missing assignments, bad grades, and other things that show I haven't performed as expected. I make it a plan to stay on top of my agenda, knowing the events that are coming up and being ahead of everything in case of a personal emergency. I am involved in extracurriculars outside of school and still make my academics my top priority, no matter what. The skills I have gained so far throughout highschool have only added to what I can accomplish in life and I plan to gain more skills as I struggle and persevere. I feel more prepared for the college atmosphere every day when I come to school, and every night as I prepare for my classes. I seek information and want to know the most I can so I am always ready for what's coming. Even during the most difficult moments during highschool, I've never given up. Using my resources, asking questions, and managing my time effectively are all skills that have contributed to my success and are skills that I work to improve every day. I do not plan on being stationary in my academics, and I know that I have a lot more to do in order to be prepared for navigating college and finding a career that will lead to my success. While I have learned a lot on my own through trial and error, the academic environment of AVID has pushed me to do better every day. The students in AVID are all driven towards college and success which isn't seen in every academic class in highschool. The collaboration and determination I have experienced in the AVID classroom has helped me immensely in reaching success in highschool. I plan on being a part of the AVID program this year because one of my biggest goals is to be prepared for the bumpy road to success, and I believe AVID will guide me to my achievement.
